

MUHAMMAD SAQLAIN YOUNAS

Software Engineer

 Saqlain Younas |  +92 313 9060439 |  saqoo1005@gmail.com |  Saqlain Younas

Professional Summary

Results-driven Full-Stack Software Engineer with 5+ years of experience. I build scalable, high-performance web applications with an emphasis on UX, clean architecture, and seamless integrations. Currently integrating AI into my development workflow to improve efficiency, code quality, and problem-solving. Outside of work, you'll find me traveling, road-tripping, exploring new coffee, or learning something new.

Skills

- JavaScript | TypeScript | HTML | CSS | Tailwind CSS | React.js | Node.js | Express.js | PostgreSQL | Next.js | D365 Commerce
- Microsoft Azure DevOps | GitHub | CI/CD | Unit Testing | Jest | Claude code | OOP | Microservices
- Effective Communication | Collaboration and Teamwork | Problem-Solving | Positive Attitude and Mindset | Multicultural Competence

Experience

Consultant Full-Stack

Visionet Systems

New Jersey, USA (Remote) 02/2024 - Present

- Led a team of up to 4 developers, managing daily task allocation, tracking progress, and resolving code-level issues to deliver timely, high-quality results. Managed Git workflows, including branching, pull request reviews, merges, and production releases.
- Built a complex micro-frontend application within a monorepo architecture, delivering multiple independently deployed MFEs while integrating AI-assisted workflows to accelerate development and reduce defects.
- Achieved 90%+ QA sanity pass rate across multiple releases, emphasizing code quality and reliability.
- Collaborated closely with QA to define test scenarios and edge cases, leveraging AI-assisted analysis to improve coverage and streamline test cycles.

Senior Associate Consultant Frontend Systems MEA (Techvista)

Dubai, UAE (OnSite) 11/2023 - 02/2024

- Contributed to front-end development for a large EU-based e-commerce platform using Microsoft Dynamics 365 Commerce, supporting the architecture and implementation of customer-facing features.
- Optimized and redesigned checkout flows by customizing out-of-the-box D365 modules and introducing a multi-step checkout, improving usability and driving a smoother purchase experience.
- Implemented a Git branching strategy in Azure DevOps, reducing deployment issues by ~30% and streamlining team workflows.

Junior Consultant Frontend

Visionet Systems

New Jersey, USA (Remote) 09/2023 - 11/2023

- Developed front-end solutions for multiple EU and US clients, focusing on e-commerce implementations with Microsoft Dynamics 365 Commerce.
- Solely developed and maintained a custom PayFabric payment accelerator for checkout, designed as a plug-and-play module for any Dynamics 365 project.
- Conducted over 100 code reviews, optimized code for performance, and streamlined version control processes, reducing deployment errors by 20%.
- Engaged with clients to understand requirements, conducted thorough analysis, devised solutions, and provided accurate estimations, enhancing client satisfaction by 15%.

Trainee & Associate Consultant

Visionet Systems

New Jersey, USA (Remote) 03/2021 - 09/2023

- Built reusable components and small applications while also completing training in React, Next.js, and TypeScript.
- Fixed bugs and optimized production applications, such as reducing network calls and improving performance.
- Collaborated with mentors on projects and training to enhance application performance and coding practices.

Software Engineer Intern

CECOS University

Peshawar, Pakistan 10/2019 - 09/2020

- Developed components for in-house projects using React, TypeScript, JavaScript, and multiple libraries, contributing to the development of an attendance management dashboard.

Education

Bachelor's in Software Engineering

2015-2019

Certifications

Meta Front-End Developer – Meta
